

# NotifyLink Enterprise Mobility Solution for KerioMailServer6

## On-Premise

Today, organizations need an effective way to provide their increasingly mobile workforce secure wireless access and management of their **Email and (PIM) Calendar, Contacts, and Tasks**. As organizations source a solution, they are faced with a variety of challenges. One such challenge is selecting the appropriate wireless devices. Another is deciding on the appropriate wireless network(s) in order to provide the appropriate support for their entire organizational coverage requirements.

Most organizations are seeking a single solution that will offer them support for a variety of wireless devices. Providing a network independent solution will enable the organization a level of flexibility to change devices or networks as technology improves. Many organizations have expanded their requirements for wireless solutions to include both mobile wireless on voice and data networks as well as fixed wireless supporting all versions of 802.11x networks.

Notify Technology has designed the NotifyLink Enterprise Mobility Solution for Kerio as a means to provide wireless access and management of **Email and PIM information for any size organization**. Notify's Enterprise solution will seamlessly integrate into an organization's existing network while offering the broadest possible wireless device support of any solution on the market today.

The NotifyLink Enterprise Mobility Solution interfaces with Kerio providing secure, real-time synchronized **Email and PIM** to and from a variety of wireless devices including Palm, BlackBerry, and Windows Mobile based handhelds. Users have the ability to compose, reply, forward, or delete their email while mobile.

In addition users can maintain mobile synchronization with their personal Calendar, Contacts, and Tasks all from their wireless device.

### What Sets the NotifyLink Enterprise Mobility Solution Apart?

Unlike many other enterprise solutions, NotifyLink provides a single enterprise solution supporting virtually all Palm, Windows Mobile, and BlackBerry OS devices simultaneously over a variety of wireless networks: GSM/GPRS/EDGE,

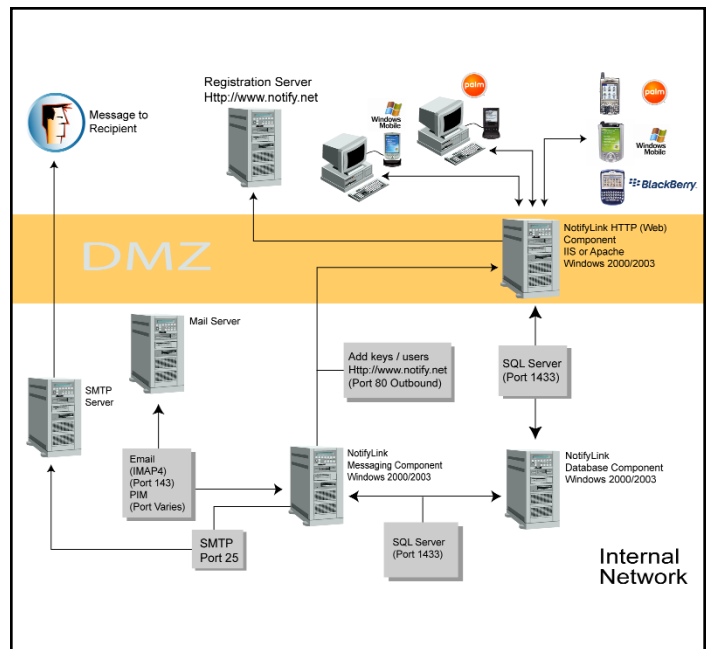

CDMA/1XRTT/EVDO, iDEN and 802.11x. The NotifyLink Enterprise Mobility Solution provides Over-the-Air synchronization of **Email and PIM** thus freeing users from being required to cradle their wireless devices in order to maintain synchronization.

The NotifyLink Enterprise Mobility Solution provides "PUSH" or notification eliminating the need for users to initiate a data session in order to retrieve their personal data.

With NotifyLink, all **Email and PIM** information will be stored safely behind an organization's firewall while all delivery of information to and from the wireless devices is encrypted utilizing either the TDES or AES encryption algorithms.

NotifyLink provides maximum flexibility for the IT professional while minimizing complexity providing multiple internal user groups with a robust solution over multiple devices and or wireless networks.

- Compose, Reply, Delete, and Forward from Wireless Device

## Customize Settings with the Web Client Interface:

---

- Define Message and PIM Notification Format
- Multilevel Filtering
- Track Mobile Activity
- Include or Exclude Email Response History

## IT Professional Benefits:

---

- Easy to Install and Configure
- Separate Web Based Administration for IT and End Use
- All Data Stored Behind the Corporate Firewall
- End-to-End Encryption Supporting AES and Triple DES
- Enterprise Scalable System Architecture
- Simultaneous Support for Multiple Devices
- Supports a Variety of Wireless and Fixed Wireless (802.11x) Networks
- Configure, Add, Enable, Disable, Delete Users

## ADMINISTRATION

---

- ▶ Simplified 1-Click Installation for single server deployments
- ▶ Improved Administration Interface
- ▶ Simplified Device Registration
- ▶ Device Management Interface

## SYNCHRONIZATION

---

- ▶ Folder Mirroring
- ▶ Automatic Synchronization of Contact Changes from Server
- ▶ Improved Email Synchronization of Deletes and Messages Marked as Read
- ▶ International Character Set Support via UTF-8 Encoding
- ▶ Global Contacts Remote Lookup

## DEVICE CLIENTS

---

- ▶ New NotifyLink V4.0 client for BlackBerry
- ▶ New NotifyLink V4.0 client for Windows Mobile
- ▶ New NotifyLink V4.0 client for Palm Treo with New User Interface and Multi-Threaded Functionality

## System Requirements:

---

The NotifyLink Enterprise Server for Kerio requires three components to be installed - the SQL Database, Web Server and Messaging Server. Requirements will vary depending on the component being installed. With NotifyLink's flexible architecture, these components may be installed to one server or may be distributed across multiple Servers. The components and their respective requirements are as follows:

- Microsoft Windows 2000/2003 Server
- Intel Pentium 4 processor or better
- 500MB RAM
- 250MB free hard drive space
- Microsoft SQL Server 7.0 or later (MSDE version of SQL may be used for smaller deployments)
- Microsoft Internet Explorer 4 or later
- APACHE HTTP Server version 1.3.x or 2.x or Microsoft IIS 4 or later
- Port 80 inbound/outbound open
